INDEX

Volume 19, 1940[1]

ABRASION: gold alloys, 299*
Acid production: effect of dentin and enamel, 286*
——: oral bacteria, 286*
——: oral cavity, 194*
ADAMS, C. O.: phosphorus; effect on bone and teeth, 312*
ADAMS, J. W.: cephalometric radiographs; correction, 313*
AISENBERG, M. S.: retained deciduous teeth, 314*
Alcohol: sulphated higher; rubefaction and toxicity, 87
Alveolar atrophy: systemic aspects, 306*
See also periodontal disease.
Alveolus: sympathetic nerves, 277
American College of Dentists: Gies awards, grants and fellowships, 344
Anadontia: hereditary, 296*
Annealing: gold foil, 300*
APPLEBAUM, E.: caries: radiopaque enamel surface, 41
——: thryoidectomy; effect on teeth, 304*
——: thryo-parathryroidectomy; effect on bone and teeth, 93
APPLETON, J. L. T.: saliva; antibacterial effect; tubercle bacillus, 279*
ARMSTRONG, W. D.: enamel; radioactive phosphorus exchange, 318*
——: fluorine; mineral salts and teeth, 314*
ARNIM, S. S.: caries; histopathology, 288*
Ascorbic acid: dentin formation, 283*
Award: William J. Gies, 344

BACTERIA: acid production, 286*, 349
——: antibacterial effect of saliva, 279*
——: caries, 1
Bacteria (*con.*):
——: decalcification, 324*
——: dentin, 300*
——: ——; tubules, 284*
——: electro-sterilization, 290*
——: fluorine; effects, 391
——: oxidizing agents; effect, 429
——: pulpless teeth, 289*
——: saliva; estimation, 349
——: sulfanilamide; effect, 319*
See also under generic names of organisms.
BAKER, C. R.: intermaxillary force; measurement, 314*
BAKER, L. W.: odontogenesis; effect on facial growth, 295*
BALE, W. F.: hereditary opalescent dentin, 521
BARBER, R.: unerupted third molar; incidence, 294*
BAUER, W. H.: fluorine poisoning, 315*
——: sclerosis of the jaw, 315*
——: temporomandibular joint; histopathology, 297*
BECKWITH, T. J.: periodontal tissues; repair, 315*
BERGASH, S. R.: density; dentin and enamel, 487
BERMAN, M.: dendritic cells in gingiva and enamel organ; phagocytosis in enamel epithelium, 292,* 497
——: dentin hypocalcia; prevention, 284,* 505
BERNSTEIN, J. G.: artificially induced fever; effect on developing tooth, 155, 193*
BESSEY, O. A.: dentin formation; ascorbic acid, 283*

[1] Abbreviations—I. A. D. R.: International Association for Dental Research, J. D. R.: Journal of Dental Research.

* Abstract.

BEVELANDER, G.: artificially induced fever; effect on developing tooth, 155, 193*
——: dentin; developmental components, 306*
BIBBY, B. G.: acid production; effect of dentin and enamel, 286*
——: ——; oral bacteria, 286*
——: fluorine; bacterial effects, 391
——: streptococci; oral, 285*
BIRD, M. J.: deciduous dentin and enamel; composition, 288,* 413
Bite: raising; temporomandibular joint relation, 301*
——: strength; Eskimo, 324*
——: ——; measurement, 314*
BLACKBERG, S. N.: castration and hypophysectomy, oral effects, 301
BODECKER, C. F.: advantages of ground sections, 300*
BOLING, L. R.: This index, 597
Bone: phosphorus effects, 312*
——: thyro-parathyroidectomy effects, 93
Books: received, 596
BOUCHER, C. O.: dentures; tissue displacement, 290*
BOYLE, P. E.: dentin formation; ascorbic acid, 282*
——: tooth staining; jaundice, 293*
BRADEL, S.: dental plaques; carbohydrate decomposition, 473
BRAWLEY, R. E.: saliva; pH; phosphorus; rate of flow, 316*
BREITNER, C.: temporomandibular joint; bite raising, 301*
BREKHUS, P. J.: caries incidence; college students, 289*
——: intermaxillary force; measurement, 314*
BRODSKY, R. H.: Grenz ray; oral lesions, 308*
BROWN, J. C.: tooth staining; jaundice, 293*
Bryant, Carrie Kirk: necrology, 327

CAHN, L. R.: red marrow; jaws, 301*
Carbohydrate: decomposition; dental plague, 473
Caries: artificial; *S. viridans*, 1
——: calcium and phosphorus ratios, 302*
——: dental plaques, 473
——: dentin; composition, 165
——: ——; pH, 171
——: enamel; radiopaque layer, 41
——: fluorine, 280,* 287,* 323,* 585
——: histopathology, 288*
——: incidence; college students, 289*
——: ——; tooth position, 17
——: ——; extraction, 571
——: mottled enamel, 323*
——: nutrition, 322*
——: organic matrix changes, 282*
——: periodontal disease; correlation, 549
——: prevention, 455
——: saliva, 303,* 563
——: ——; quantity, 298*
——: salivary calculus, 303*
——: silver nitrate, 321*
——: statistics; comparison, 545
——: ——; methods, 243
——: ——; standards, 479
——: susceptibility, 294*
——: tooth extraction, 571
CALANDRA, J.: sulphated higher alcohols; rubefaction and toxicity, 87
Calcification: enamel, 302*
Calcium: caries, 302*
Carnivora: supernumerary and missing teeth, 103
CARR, M. W.: temporal spaces; acute infection, 307*
Castration: oral mucosa effects, 326,* 381
Cement: zinc phosphate; physical properties, 299*
CHEYNE, V. D.: caries; tooth extraction, 571
——: fluorine; caries inhibition, 280*
CHRISTENSEN, K.: sympathetic nerve fibers; alveolus and pulp, 277
CHURCHILL, H. R.: periodontal disease; predisposing factors, 291*
Cod liver oil: prevention of dentin hypocalcia, 284,* 505
Composition: deciduous dentin and enamel, 288,* 413

* Abstract.

Composition (*con.*):
——: dentin; caries, 165
——: ——; hereditary opalescent dentin, 521
Constitution: I. A. D. R.; proposed revision, 339
Cook, T. J.: introduction of Joseph McFarland, 309*
——: systemic disease; oral manifestations, 305*
Coolidge, E. D.: Rudolf Kronfeld; tribute, 266, 312,* 428
Copper amalgam: dimensional changes, 322*
Crowley, M.: vital teeth; clinical and bacteriologic study, 323*
Cushman, F. H.: saliva; quantity; caries, 298*

DAHLBERG, G.: caries standards for statistical studies, 479
Daniel, L. H.: unerupted third molar; incidence, 294*
Darlington, C. G.: endocrine dyscrasias; dental study, 194*
Deakins, M. L.: caries; effect on dentin composition, 165
——: ——; organic matrix changes, 282*
Decalcification: arrested, 285*
——: bacterial, 324*
——: cemented orthodontic bands, 47
See also caries.
Deciduous teeth: periodontium; trauma, 441
——: retained, 314*
Dendritic cells: enamel organ and gingiva, 292,* 497
Density: dentin; hereditary opalescent, 521
——: ——; and enamel, 487
Dentin: acid production; effect, 286*
——: bacteria, 300*
——: composition; caries, 165
——: ——; hereditary opalescent, 521
——: deciduous; composition, 288,* 413
——: density, 487
——: fatty change, 325*
Dentin (*con.*):
——: formation; artificial fever, 155, 193,* 215, 284,* 505
——: ——; ascorbic acid, 282*
——: ——; developmental components, 306*
——: ——; thyroidectomy, 304*
——: hereditary opalescent, 521
——: operative procedures; effect, 179
——: organic matrix; caries, 282*
——: pH; carious and non-carious, 171
——: phosphorus; effect, 312*
——: tubules; bacteria, 284*
——: ——; size, 317*
——: vitamin D application, 373
Dentures: tissue displacement, 290*
Dermoid: ovarian; containing teeth, 145
DIAGNOSIS: caries, 11
Diamond, M.: hypoplasia; histogenesis, 302*
——: matrix formation; enamel, 302*
Dicalcium phosphate: hypocalcia prevention, 284,* 505
Dowell, R. L.: intermaxillary force; measurement, 314*
Drain, C. L.: caries; tooth extraction, 571

EASTON, G. S.: technic metal; wrought, 403
Edwards, R. W.: anadontia; inherited, 296*
Ehrenhaus, J.: fusospirochetal lesions; pathology, 307*
Electro-sterilization: bacteria, 290*
Elman, E. S.: mandible; relation of first molar, 316*
Enamel: acid production; effect, 286*
——: acid solubility, 35
——: deciduous; composition, 288,* 413
——: density, 487
——: organic matrix; formation, 302*
——: phosphorus exchange, 318*
——: radiopaque surface layer, 41
——: spindles; etiology, 195
Enamel epithelium: phagocytes, 292,* 497
Enamel organ: dendritic cells, 292,* 497

* Abstract.

Eosinophile leukocytes: gingiva and pulp, 293,* 537
Eruption: pattern and rate, 318*
——: teeth, 298*
——: vitamin D, 287*
Eskimo: bite strength, 324*
ETHERINGTON, J. W.: saliva; quantity; caries, 298*
Extraction: caries incidence, 17, 571

FAILLO, P. S.: vitamin D; dentinal application, 373
FAUBION, B. H.: unerupted third molar; incidence, 294*
Fellowship: William J. Gies, 344
Fever: artificially induced; effect on developing teeth, 155, 193,* 215, 284,* 505
FIGG, W. A.: bacteria; dentinal tubules, 284*
FINN, S. B.: fluorine; rachitic rats, 281*
——: hereditary opalescent dentin, 521
FLEMING, W. C.: periodontal tissues; repair, 315*
Fluorine: apatite and enamel, 320*
——: bacterial effects, 391
——: caries, 280,* 287,* 323,* 585
——: determination, 321*
——: mineral salts and teeth, 314*
——: rachitic rats, 281*
——: radioactive isotope, 282,* 585
——: salivary excretion, 585
FOSDICK, L. S.: odor; breath and mouth, 173
——: sulphated higher alcohols; rubefaction and toxicity, 87
FOSTER, W. C.: fluorine; determination, 321*
FREIDRICH, E. G.: dentin tubules; size, 317*
FRENCH, E. L.: composition; deciduous dentin and enamel, 288,* 413
Fusospirochetal lesions: pathology, 307* *See also* Vincent's infection
FUTTERMAN, M. J.: endocrine dyscrasias; dental study, 194*

GALVANIC current: oral cavity, 291*
GARRISON, L. H.: artificial fever; effect on tooth development, 215
Gies, William J.: awards, grants and fellowships, 344
GIES, W. J.: address; I. A. D. R.; work and functions, 258, 312*
Gingiva: castration and hypophysectomy; effects, 381
——: dendritic cells, 292,* 497
——: eosinophile leukocytes, 293,* 573
Gold: alloys; abrasion, 299*
——: foil; annealing, 300*
GORE, J. T.: caries; prevention, 455
——: ——; saliva; clinical studies, 563
——: ——; decalcification; arrested, 285*
Grants: William J. Gies, 344
Greenlanders: caries; saliva; salivary calculus, 303*
Grenz rays: oral lesions, 308*
GROSSMAN, L. I.: pH; dentin; carious and non-carious, 171
Growth: facial bones; effect of teeth, 295*
——: pattern; conical teeth, 317,* 511
——: skull; serial radiographs, 323*
GURLEY, W. B.: operative procedures; histologic response, 179
GUNTER, J. H.: periodontal disease; predisposing factors, 291*

HALL, E. R.: supernumerary and missing teeth; wild mammals, 103
HAMMOND, C.: artificial caries; *S. viridans*, 1
HATTON, E. H.: list of members; I. A. D. R., 592
——: sulphated higher alcohols; rubefaction and toxicity, 87
Hereditary opalescent dentin, 521
Heredity: anadontia, 296*
HERZBERG, F.: conical tooth form; growth pattern, 317,* 511
HODGE, H. C.: composition; deciduous dentin and enamel, 288,* 413
——: density; dentin and enamel, 487
——: fluorine; radioactive isotope, 282*
——: hereditary opalescent dentin, 521
HOFFMAN, M. M.: eruption; pattern and rate, 318*
Hypophysectomy: oral mucosa effects, 326,* 381

* Abstract.

Hypoplasia: histogenesis, 302*
See also dentin: formation

IMPACTED teeth. *See* unerupted teeth
Infant: jaws; trauma, 357
Insectivora: supernumerary and missing teeth, 103
Intermaxillary force: Eskimo, 324*
——: measurement, 314*
I. A. D. R.: constitution; proposed revision, 339
——: members, 592
——: New York Section; proceedings, 193, 425
——: proceedings; address; inaugural, 258, 312*
——: ——; ——; J. McFarland, 309
——: ——; ——; presidential, 276, 312*
——: ——; contents, 257
——: ——; executive, 329
——: ——; index of participants, 278
——: ——; J. D. R., 332
——: ——; necrology committee, 327
——: ——; new members, 336
——: ——; officers, 336
——: ——; reports of committees and officers, 329
——: ——; tribute to Rudolf Kronfeld, 266, 312,* 428
——: work and functions, 258
Isotope: radioactive; fluorine, 282,* 585
——: ——; phosphorus, 292*

JAUNDICE: tooth staining, 293*
J. D. R.: sustaining subscribers, 591

KANTER, F.: saliva; antibacterial effect, 279*
KARSHAN, M.: caries; calcium and phosphorus ratios, 302*
——: ——; saliva; salivary calculus, 303*
KELLEY, H. T.: periodontal disease; predisposing factors, 291*
Keratinization: oral mucosa, 57
KERR, D. A.: vital pulp; pathology, 319*
KITCHIN, P.: prevention of dentin hypocalcia, 284,* 505
KLEIN, H.: caries; statistical studies, 243
——: ——; susceptibility, 294*
KLOSTERMAN, J. A.: lactic acid production; oral cavity, 194*
KNIGHTON, H. T.: oxidizing agents; effect on anaerobes, 429
KOCH, W. E.: this index, 597
KOCOUR, E. J.: saliva; buffering power, 319*
——: sulfanilamide: salivary excretion, 319*
KRASNOW, F.: I. A. D. R.; New York Section; proceedings, 193, 425
——: salivary magnesium, 305*
KRONFELD, R.: ovarian dermoid containing teeth, 145
——: periodontium; traumatic changes, 441
——: trauma; infant jaws, 357
Kronfeld, Rudolf: tribute, 266, 312,* 428

LACTOBACILLUS: saliva; estimation, 349
LASATER, R. L.: gold alloys; abrasion, 299*
LEFKOWITZ, W.: decalcification; cemented orthodontic bands, 47
——: planing machine; tooth sections, 304*
LESNEY, T. A.: odor; breath and mouth, 173
LOSCH, P. K.: tooth staining; jaundice, 293*

MAGNESIUM: salivary, 305*
Mandible: relation of first molar, 316*
MANLY, M. L.: hereditary opalescent dentin, 521
MANLY, R. S.: caries; effect on dentin composition, 165
——: hereditary opalescent dentin, 521
Marrow: red; jaws, 301*
MASSLER, M.: conical tooth form; growth pattern, 317,* 511
McCLENDON, J. F.: fluorine; determination, 321*
——: ——; enamel, 320*

* Abstract.

McCrea, M. W.: J. D. R.; sustaining subscribers, 591
McFarland, J.: address; I. A. D. R., 309
metal: technique; wrought, 403
Method: fluorine determination, 321*
——: intermaxillary force; measurement, 314*
——: ground section, advantages, 300*
——: pH; saliva, 297*
——: plano-parallel tooth sections, 304*
——: plasma phosphatase determination, 73
——: saliva; bacterial estimation, 349
——: statistical study; caries, 243
Midgley, A. L.: Gies awards; grants and fellowships, 347
Millberry, G. S.: silver nitrate; caries, 321*
Miller, B. F.: dental plaques; carbohydrate decomposition, 473
Miller, S. C.: alveolar atrophy; systemic aspects, 306*
——: periodontal disease; caries; correlation, 549
——: torus palatinus, 321*
Mitchell, J. V.: cement; zinc phosphate; physical properties, 299*
Morgareidge, K.: fluorine; rachitic rats, 281*
Morrison, M.: composition; deciduous dentin and enamel, 288,* 413
Morse, F. W., Jr.: pulpless teeth; bacteria, 289*
Mottled enamel: caries, 323*
See also fluorine.
Mucin: gastric and salivary; phagocytosis, 279*
Mucosa: oral; keratinization, 57
Muntz, J. A.: dental plaques; carbohydrate decomposition, 473

NEOPLASM: ovarian dermoid, 145
Neuwirth, I.: lactic acid production; oral cavity, 194*
Nerve: sympathetic fibers; alveolus and pulp, 227
Nutrition: caries, 322*

OBLATT, E.: salivary magnesium, 305*
Odontogenesis: effect on facial growth, 295*
——: *See also* dentin: formation.
Odor: breath and mouth, 173
Operative procedures: histologic response, 179
Orban, B.: eosinophile leukocytes; gingiva and pulp, 293*, 537
Orthodontic: bands; cemented; decalcification, 47
——: treatment; root resorption, 295,* 367
Oxidizing agents: effect on anaerobes, 429

PALMER, C. E.: caries; statistical studies, 243
——: ——; susceptibility, 294*
Parathyroidectomy: bones and teeth effect, 93
Payne, Joseph Lewin: necrology, 328
Pedersen, P. O.: caries; saliva; salivary calculus, 303*
Pelzer, R. H.: plasma phosphatase determination; periodontal disease, 73
Peridontal disease: caries; correlation, 549
——: plasma phosphatase determination, 73
——: predisposing factors, 291*
See also alveolar atrophy.
Periodontium: repair, 315*
——: sympathetic nerve fibers, 227
——: traumatic changes, 357, 441
Peterson, H. W.: gold foil; annealing, 300*
pH: carious and non-carious dentin, 171
——: saliva, 316*
——: ——; quinhydrone and glass electrodes, 297*
Phagocytosis: enamel epithelium, 292,* 497
——: gastric and oral mucin, 279*
Phosphatase: plasma; determination; periodontal disease, 73
Phosphorus: bone and teeth; effect, 312*
——: caries, 302*
——: metabolism; teeth, 292*
——: radioactive; enamel, 318*
——: saliva, 316*

* Abstract.

Physiology: dental, 193*
Plaques: dental; carbohydrate decomposition, 473
PRICE, W. A.: caries; nutrition, 322*
Pulp: artificial fever; effect, 155, 193,* 215
——: eosinophile leukocytes, 293,* 537
——: fatty change, 325*
——: fillings; bacterial studies, 289*
——: operative procedures; effects, 179
——: sympathetic nerve fibers, 227
